

## Technical Training Course

Ampco recently offered its first Technical Training Course at our plant in Glendale, Wisconsin. Thirteen distributors from the U.S., Canada and Mexico attended the 1-1/2 day session taught by Steve Schuetz, Eastern Regional Sales Manager, and Larry King, Midwest Regional Sales Manager. The course covered Ampco's entire product line, including sanitary, marine and industrial pumps. A full day classroom session was followed by a half day of hands-on training in the shop.

We received a very favorable response from all the attendees and are planning another session this fall. Participants are responsible for all travel arrangements and Ampco takes care of food and lodging. If you have an interest in attending the next session please contact your regional sales manager. If you aren't able to attend a formal training program we would be happy to see you at any other opportunity.

One of the most frequent comments we received from participants, as well as other plant visitors, is "I didn't know you had those capabilities." Apparently we need to do a little more bragging. Here are some pictures of Ampco's facility and personnel, but trust us, we look better in person.

## Just a Reminder!

If you have received a quotation from one of our sales staff, please remember to include the quote number on your purchase order. Also, please remember to specify impeller trim and seal materials on all pump orders.

## Trivia Contest

**\*\* Win a Starbucks Gift Card\*\***

What series of industrial pumps did Ampco introduce in 2007 based on the popular AC series pumps?

Please fax your response to 414-643-4452 no later than May 15th. Good luck!
