

Pack/Process Expo October 5-7 in Las Vegas

Please come and see us at Booth S-7050 in Las Vegas this year. We've increased our floor space to make room for an expanded display of ZL rotary lobe pumps which are rapidly gaining popularity. These pumps have EHEDG approval and are 100% CIPable. We'll also introduce a couple innovations to the centrifugal pump line that should be quite interesting. More on that next month.

Worldwide Food Expo

For the first time in our history, we are not going to exhibit at Worldwide Food Expo this year. Unfortunately, attendance at recent shows simply doesn't justify the time and expense involved. If you are planning to visit the show in Chicago, please feel free to stop and see us in Glendale, WI, only 90 minutes north of Chicago.

New Hires

We recently added two new sales managers that will greatly expand our presence outside the U.S.

Martha Villasenor will be responsible for sales in Mexico, Central and South America. Martha will work closely with our partner Q-Pumps to develop the sanitary market and she will establish independent distributors in the marine and industrial markets. Martha is based in Madison, WI.

Stefan Anderson will be responsible for sales in Europe, Asia, Australia and Africa. Stefan has extensive international experience with both pumps and valves. He is based in Landau, Germany.

Technical Training

We are offering another training course this November 3rd & 4th. The 1-1/2 day session will focus on sanitary products and include a full day classroom session followed by a half day of hands-on training in the shop. The session will be taught by Steve Schuetz, Eastern Region Sales Manager and Martha Villasenor, Latin America Sales Manager. Participants are responsible for all travel arrangements and Ampco will provide food and lodging. If you have an interest in attending this session, please contact your regional sales manager.

Please contact your regional sales manager for additional information.

Joe Hayes (800) 862-5606 (Southeast Region)

How many rotor options are in Ampco's ZL series?

Please fax your response to 414-643-4452 no later than September 30th. Good luck!

JUST A REMINDER

It is imperative that customers look at freight / UPS boxes when they are received and to report any damage at the time of delivery. Unless damage is reported to delivering driver, Ampco cannot be responsible for damaged goods and working with the carriers on a resolution. If you or your customer receives damaged goods, please follow the procedures listed below:

- 1) Report damage to delivering driver
- 2) Take digital pictures, if possible
- 3) Contact Heidi Leichtnam at Ampco Pumps of any problems and include pictures
hleichtnam@ampcopumps.com
