

# Ampco Pumps Company

## New SBI

Ampco recently sold the first SBI shear blender pump with a built-in impeller.

This design offers positive pumping capability in addition to efficient blending performance. The SBI is available on a trial basis in models V520, V530, V540 and V550. We are developing performance curves for this product line but don't expect them to be available until early 2012.

## Ampco Pumps GmbH

We recently incorporated Ampco Pumps GmbH in Herxheim, Germany to service a growing customer base in Europe and Asia. In order to compete successfully, we feel it's necessary to have local service and inventory. This will enable us to better service international customers that are increasingly looking for worldwide support. The European operations will be managed by Stefan Andresen and will focus primarily on sanitary product lines.

## Process Expo 2011

Ampco will be exhibiting at Process Expo 2011 in Chicago from November 1st - 4th. Please stop by booth #3614 to see the new ZP3 pump and the rest of our sanitary product line including ZL lobe style pumps, LC/LF centrifugal pumps, LH high pressure pumps and AC/AC+ centrifugal pumps.
