

## **LF Series Sanitary Centrifugal Pumps**

Ampco is pleased to introduce the LF Series of sanitary pumps. LF pumps are identical hydraulically and dimensionally with the LC Series. The primary difference is the front loading seal design which offers improved accessibility and easier maintenance.

LF pumps are readily convertible to a double seal without changing any other parts. Standard seal material is silicon carbon / carbon / viton, but all standard seal materials are available.

LF pumps are interchangeable with Fristam's competing FPR product line. All LF pumps include a standard stainless steel adapter and are in stock for immediate delivery. Pricing is now available on line at [www.ampcopumps.com](http://www.ampcopumps.com).

# LC / LD/ LF / SP Brochure

Our new LC/LD/LF/SP brochure is enclosed. Please contact the Milwaukee office or your regional sales manager if you would like additional copies. These pumps offer 100% interchangeability and a significant cost advantage, compared to the competing brand. The quality of these pumps is equal to, or superior to, the competition.

- Plus:
- \* We include a standard stainless steel adapter at no extra charge
  - \* We don't charge to expedite parts in less than 3 days
  - \* We don't charge to trim impellers
  - \* We test every assembled pump on our test stand
  - \* Delivery on standard pumps is one week or less

If you are still misled by rumors about inferior quality seals or poor exterior finish, you need to contact your regional sales manager to inspect a sample pump. We're confident you'll be pleasantly surprised.

## ***Did you know?***

*If you add an e-mail address to your purchase order, the carrier will e-mail your tracking information directly to you!*

Please contact your regional sales manager for additional information.
