

TIRED OF CIP RETURN PROBLEMS?

Ampco's DC2 Series has set the standard for CIP supply pumps for nearly 20 years. Now our new DV Series offers an affordable solution to your CIP return problems

Ampco's new DV Series with a unique **double volute** design reprimers faster than standard centrifugal pumps to reduce air binding problems and eliminate the need for an air relief valve in most applications. These benefits plus the **proven** reliability of an Ampco pump will put your CIP problems in the past.

We are so confident of this new pump that it comes with a **performance guarantee**. If you're not completely satisfied you can return it within 30 days of installation for a full refund. In addition, the casing, cover and impeller are covered by the only five year warranty in the industry.

Of course, the DV Series offers all of the usual advantages of an Ampco pump:

- Efficient performance
- Longer seal life
- Quiet operation
- One week delivery
