

SPECIAL UPGRADE OFFER

Get a new stainless steel gearcase **FREE**

When you remanufacture your worn U1/U2 and upgrade to our **PATENTED ZP1+/ZP3** you will receive a **FREE** upgrade to a new stainless steel gearcase.

Ampco's remanufacturing program is a complete remanufacture of your worn pump...**it is not a repair.**

Remanufacturing Advantages

- Body and cover are remachined to matching dimensions
- New pump specifications (clearances and performance) are achieved with new, oversized rotors
- Ampco's signature material upgrades are included with the reconditioned, powder coated gearcase
- Upgrade a U2-style pump to Ampco's patented ZP3 front-loading seal design
- Upgrade a U1- style pump to Ampco's patented ZP1+ front-loading seal design
- Universal style pumps can be remanufactured up to four times at .0020" increments
- Gearcase is sand blasted and powder coated

A contribution to our sustainability goals

- Ampco reuses 75% of the original stainless steel in the remanufacturing process
- Rotors and other non-reused metal components are recycled
- Carbon emissions related to new casting manufacturing and transport are eliminated
