### PI-SP215-210TC / SIMPLE-blend

#### INDUSTRY

Food

#### CHALLENGE

The customer needed to find a way to introduce spices into eggs without shearing the egg mix. The fat content of eggs makes it difficult to mix in spices and there was a lot of separation with spices floating to the top of the mix.

#### SOLUTION

The simple-blend powder induction unit introduces the spices with minimal shear. The self-priming sp pump allows for a smooth induction process. The customer is now getting the desired mix without whipping or shearing the eggs.
