

Ampco PE Pumps

Premium Economy Pump

- Remanufactured to NEW pump standards
- Highest quality
- Stocked for immediate shipment
- Budget friendly

ONE YEAR FULL FACTORY WARRANTY

Ampco PE Pumps are remanufactured with new parts, machined to new pump standards and each pump is fully tested before shipping.

Ampco PE pumps cost 25% less than a comparable new pump. By remachining the body, cover and gear case, material costs are greatly reduced.

The Ampco PE Pump program is unique because pumps are on the shelf, fully machined, assembled and ready for immediate delivery. This program was designed to offer quality, convenience and value pricing. Most customers in need of an immediate solution now have a cost effective option.

FEATURES OF THE AMPCO PE PUMP

- **17-4 PH** – Provides four times the yield strength of 316
- **Stainless Steel Bearing Retainers** – Prevents corrosion and enhances bearing protection
- **Helical Gears** – Increased load carrying capacity and reduced noise
- **Powdercoat Paint** – Better protection in a caustic environment and chip resistant
- **Stainless Steel Sealed Cleanout Plugs** – Protect and extend bearing life from water penetration
- **Stainless Steel Splash Guards** – Protect bearings during high pressure wash-down

PE Pump Remanufacturing Process

All internal components; rotors shafts, bearings, gears, spacers, and seals are new.

- Body and cover are machined to standard oversized dimensions; +.020, .040, .060, .080.
- Body and cover are polished to original 32 RA finish.
- New oversized rotors are installed for new pump performance/efficiency.
- Pumps are assembled to the same factory specified tolerances of a new pump.
- Pumps are 100% water-tested before shipment to assure flow requirements are met.
- All pumps are sold with a one year full factory warranty – the same warranty as a new pump.

PE Pumps are in stock and ready for immediate delivery. Visit our website for current inventory.
